

IDENTIFY - ASSESS - CONTROL

As a result of population growth - and industrial and technological development - hazardous materials such as **Asbestos**, PCBs, Lead and chemicals have become an inevitable component of our environment.

Australian law has a mandatory requirement for any business containing hazardous materials within the workplace to register this information in a central location.

HAZMATregisters

www.hazmatregisters.com.au allows any business to run a secure, centralised on-line **register** for an unlimited number of sites and buildings. **HAZMATregisters** helps businesses to fulfil their **legal obligations**, manage **existing risk** efficiently and effectively as well as being pro-active with the **perceived risks** to employees, tenants, the community and any other stakeholders.

All HAZMAT surveys conducted by SLR Heggies automatically use this website, giving clients direct access to their prepared reports and survey data, photographs and lab results, with the option of converting to an ongoing **HAZMATregister** at the end of the survey cycle.

SLR Heggies can convert and merge existing survey data into a single resource. Alternatively, users can add their own location and sample information from previously commissioned surveys or undertaken by your own trained personnel. This enables you to build and maintain your own personal HAZMATregisters without the requirement to develop or purchase and install additional software.

Benefits

- Timesaving Managing Issues
- Secure Web Technology
- Centralise all Data
- Custom Report Generator
- Auditable Trail
- Cost Effective
- Easy to use

Why do a HAZMAT survey?

A Hazardous Materials Survey is a survey of buildings or structures for materials likely to be hazardous to health, either of construction workers or occupants, or to the environment.

The most common reasons to initiate a survey include:

- Legislative requirements to protect workers or occupants
- Refurbishment or demolition
- Buying or selling
- General due diligence

Risk Management

A HAZMAT Survey is a risk management exercise. If a survey is undertaken by people without any accreditation, professional qualifications or experience it may not be acceptable to government authorities. Furthermore it may not withstand legal or union scrutiny.

SLR Heggies HAZMAT Services

SLR Heggies conduct thorough inspections, taking samples of materials for NATA laboratory analysis where necessary. Inspections are generally carried out during normal hours, however, if required the survey can be undertaken out of hours. SLR Heggies operate 24 hours per day and provide an emergency call out service Critical Response Management Service.

SLR Heggies HAZMAT survey reports available on-line

Hazardous Materials Survey information prepared by SLR Heggies and uploaded to www.hazmatregisters.com.au constitutes an Asbestos Register under Australian State Legislation, if users choose to maintain and update their survey data online.

Is your Asbestos Register up to Date?

[NOHSC:2018(2005)] (Section 9.3.1) states that asbestos registers should be reviewed every 12 months or earlier where a risk assessment indicates the need for re-assessment or asbestos containing material has been disturbed or removed. The review should include visual inspection of the identified materials.

Do you have other HAZARDOUS Materials or Chemicals?

Additionally, Polychlorinated Biphenyls (PCBs), Lead, Ozone Depleting Substances (ODSs) Chlorofluorocarbons (CFCs) and Synthetic Mineral Fibre (SMF) and chemicals can all be managed with www.hazmatregisters.com.au

SLR Heggies Specialist Range of Technical Services

SLR Heggies technical expertise is centered around the following four areas:

- Occupational Health & Safety
- Building Technology
- Acoustics, Noise & Vibration
- Environmental Management
